

Acetabular Reamers

Reliable cutting performance for accurate repeatable performance.

Enztec Acetabular Reamers are engineered to create a perfectly hemispherical cavity with a smooth finish, supporting precise sizing and confident preparation in every procedure.

Designed for consistent performance, they produce a clean, reliable cut that surgeons can depend on.

Available in 1 mm increments from 36 to 74 mm in a crossbar connection, there is a reamer to suit your needs.

Features

- Sharp cutting edge
- Accurate and consistent sizing
- Wide range of sizes to support different patient anatomies (36mm to 74mm)
- Available in 1mm size increments
- Crossbar connection
